

JOSUE MORENO

Software Developer | Frontend Engineer & Web Designer

ABOUT ME:

I'm a frontend developer who finds joy in crafting clean, intuitive, and visually captivating web experiences. My journey began with a deep love for technology and design, leading me to explore photography and creative arts. This blend of technical skill and artistic vision allows me to approach frontend development with a unique perspective.

Before diving into tech, I worked in sales, which honed my skills in communication, leadership, and understanding client needs. This background helps me build not only functional but also user-centric interfaces that resonate with people. I'm passionate about continuous learning, and I'm eager to bring my blend of creativity and technical expertise to a forward-thinking team. Let's create something amazing together!
